FORMATION

High School
St Benoît
CESS
2016 - 2022

Higher Education
Ephec
2022 - today

EXPERIENCE

Student

Last year as a student in higher education, I did not yet have any concrete experience but possess the necessary skills for several areas in the coding world. However, I participated in some great projects. Here are some :

- F1 competition ranking simulation in C++
- Python ant simulation
- Electronic components sorter: 6 motors and a camera, controlled by a Raspberry Pi; AI-based component detection and robotic arm sorting mechanism; stock tracking website
- React native license learning app
- International Week in Finland: development of an autonomous parking RC car (Bluetooth, Arduino, motors control)
- Working on a professional photo sorting app in PyQt

Young and motivated, I do not yet have professional experience, but I am determined to learn and will be working with motivation.

SKILLS

- Main programming languages : React, React native, Python, JS/HTML/CSS
- Other familiar programming languages : C++, Arduino, Angular
- Database : SQL Anywhere, SQLite
- Coding environments : Visual Studio, PyCharm, JetBrains suites, android studio
- Virtualization : VMware, Docker
- Ability to quickly learn new software and technologies
- Knowledge in Agile, DevOps, Scrum and other widely used working techniques
- Ready to work in a team
- Creativity
